

# THE AUTISM PROJECT'S SPRING ONLINE TRAINING SERIES

## Understanding Autism

A nonclinical training for professionals and caregivers to gain a better understanding of ASD. Participants will get a baseline understanding of the daily challenges of children with communication and self-regulation challenges and how their needs impact their behavior.

### Visual Supports in Practice

Participants gain a better understanding on how to create and use visual supports to better support individuals with ASD/DD by increasing independence, promoting communication and reducing challenging behaviors.

### Positive Behavior Supports

This training provides information and tools to help participants view challenging behavior through a different lens addressing possible skill deficits, coexisting conditions, and motivation of behaviors. Learn to create positive behavior supports to help build healthier interactions.

### Creating the Connections

This 2-hour training provides participants with information and resources to identify typical and atypical development, access appropriate supports for developmental concerns, better understand the diagnostic levels of Autism Spectrum Disorders, and use visual supports.

**For your convenience training can be accessed any time!**

**Cost: \$30.00 per class**

**Trainings are approved for 2 PD hours for Rhode Island  
and 2 NASW-RI credits**
